Spalled and damaged concrete in a chemical unload area are commonplace... the repair technology is not.

Using state of the art polymer technology these repairs were completed in one day and reached full compressive strength in just 24 hours. Find out how the RPG Surface Prep Industrial Services Concrete and Joint Repair Team can restore the integrity and safety of concrete slabs, curbs, expansion joints and cracks in your concrete unload areas and containment areas while restoring the integrity of your assets and maintaining a safer work environment for your employees.

Call our Concrete and Joint Experts today for a free evaluation of your concrete needs.
